1 Annotation Instructions

2 Dataset

2.1 Description

2.2 Interesting Data Points

2.3 Annotation Agreement

3 Discussion Questions

1. What did you learn about the task from doing the annotation?
2. What challenges do you expect models to face when learning from your data?
3. What surprising things did you observe in the data?
4. Which features do you expect to be useful
5. Describe the mental model you came up with to do the task at a high level. What process did you use?
6. Was there anything unclear about the instructions? How would you recommend modifying them in the future to make them more helpful?
